

# ROV Systems

## What are the exact power specifications of VideoRay systems?

Input power is universal AC:

100-240 Volts AC; 50, 60 Hz

ROV power from the control panel to the ROV via the tether is as follows:

48 Volts DC Scout, Explorer, Pro (series except Pro 4), Deep Blue

74 Volts DC Pro 4

For more information, see the FAQ, "[What is the pin-out for the 8 pin term block whip on the ROV?](#)"

Power available via the accessory port for Pro series can be found in the FAQ, "[What is the pin-out for the 9 pin ROV accessory connector?](#)"

Unique solution ID: #1064
